April 17, 2012

Dear INACAP Colleagues:

It was a pleasure to have hosted your visit to the California State University, April 8-17. Our collaboration enabled you, and our own faculty, to attend a series of teaching effectiveness seminars, an Instructional Technology Fair, and a statewide Symposium on University teaching.

Highlights of these events include:

- "Helping Faculty Develop and Teach Hybrid/Online Courses"
- "Giving Students What They Crave: A Tour of Technologies to Engage Today's Learners"
- "OER/Quality and Affordable Learning Solutions and how their use can enhance teaching and learning"
- "Hi-Impact Learning practices, shown to be beneficial for college students from many backgrounds"
- "Teaching and Technology Horizons with the Horizon Report"
- "Educating the Net Generation: Blended Learning Research Perspectives"
- "Open Learning Initiative: Using intelligent tutoring systems, virtual laboratories, simulations, and frequent opportunities for assessment and feedback"
- "Promoting Critical Thinking in the Classroom through Course Design"

We wish you continued success with your Masters of Pedagogy in Higher Education program and hope that these professional development experiences have a positive effect on the important work that your faculty perform.

Sincerely,

*Brett C. Christie*
